## **TECHNICAL BULLETIN**

### **MITSUBISHI – MAGNA TJ**

#T0131

**Make:** Mitsubishi

**Model:** Magna TJ 2000-2003 3.5L

**Subject:** Engine will not start / engine stalls

**TEST:** Check the battery voltage when starting the engine. Battery voltage should be 12.5V, battery voltage will be low (9.8V) but the cranking speed of the engine will be near normal.

The battery type fitted from the factory will be Black Diamond.

**FAULT:** Replace the battery. The battery voltage was too low to allow the PCM to function.
